

# Lead Mobile App Developer

An established company is looking for a top-quality React Native developer to lead the creation of best-in-class solutions. We are experiencing strong growth and looking for self-starters who want to be challenged. We are building a team that is creative, fun, and result oriented. Our lead developer must be a visionary with a strong knowledge base for helping management take a product from ideation to deployment and beyond. The candidate will be required to help build a world class team that can adapt to our growth and client demands. The goal is to create a flexible yet well-structured front-end architecture that integrates with existing and future APIs. Come join a company that aspires to go national with our novel solutions to complex challenges.

Responsibilities would include:

- Coordinate with development teams and designers to develop web and mobile applications that run on numerous platforms
- Using React Native, design and develop user interface components for online and mobile apps.
- Troubleshoot issues and improve front-end performance
- Write reusable, effective, as well as scalable code and create interchangeable front-end modules
- Understand clients' needs to build apps in an Agile development environment
- Maintain an efficient DevOps pipeline utilizing best practices for continuous integration & deployment
- Plan the data and presentation layer of the applications' front-end
- Research and evaluate new technologies (Blockchain, smart contracts, NFTs, etc)

Preferred skills include:

- Dedication to automated testing and writing quality code
- Experience with REST APIs
- Previous experience with React and React Native
- Ability to work in a Scrum development environment
- Experience with AWS cloud solutions

Nice to have:

- Knowledge of healthcare compliance standards and HIPAA
- Familiarity with Python, Django, and the Django Rest Framework
- Experience with Jira and other Atlassian tools
- Familiarity with CircleCI or similar DevOps platform
- Familiarity with LaunchDarkly or similar feature flagging solution
- Desire to develop Blockchain-based solutions
- Agile project management certification

Interested developers should send a resume to our CTO at [james@relief.health](mailto:james@relief.health).
